## Summary

---

Enthusiastic IoT Engineering student with strong interest in software development. Experienced in building full-stack applications using React, Node.js, and Flask, with deployment on cloud platforms such as Vercel. Passionate about applying Artificial Intelligence to real-world projects, eager to contribute and learn during an internship opportunity.

## Education

---

King Mongkut's Institute of Technology Ladkrabang (KMITL)

B.Eng. in IoT Engineering (Scholarship), Expected 2026

2022 – Present

## Languages

---

Thai: Native

English: Intermediate (Toeic 750)

## Technical Skills

---

Languages: JavaScript, Python, C, Go (learning)

Frameworks: React, Node.js, Express, Next.js (learning)

Frontend: HTML, CSS, Tailwind CSS, Bootstrap, Figma

Backend: PostgreSQL, MongoDB (basic)

Tools: Git, GitHub, Docker (basic), Vercel

## Projects

---

**AI-See:** AI-based image recognition web app (React + Flask), deployed on Vercel.

**SuperTool:** Full-stack AI tool application with React/Node.js and REST API.

**IoT-Web:** IoT dashboard with data visualization.

**GoCart:** Multi-vendor e-commerce template using Next.js and Tailwind CSS, integrated with AI to auto-fill product information.

## Experience

---

**2025 – Present:** Self-learning and building personal projects hosted on GitHub. Collaborated with peers to develop small-scale web applications.

**2022 – Present:** Active in university programming activities, hackathons, and workshops.

## Achievements

---

**Scholarship:** Received university scholarship for IoT Engineering program.

## Interests

---

Web Development, IoT, Cloud Computing, Artificial Intelligence
